

Company Profile

Message from the Managing Director

At Skytech Engineering, our journey has been driven by a clear vision to deliver reliable, high-performance engineering solutions that meet the evolving needs of modern infrastructure and environmental protection.

From coastal and marine applications under our WavePlus brand to sustainable green solutions through SkyGrow, we are committed to innovation, quality, and long-term value creation. Our focus has always been on understanding project requirements in depth and delivering solutions that perform in real-world conditions.

We take pride in sourcing high-quality materials, maintaining strict quality standards, and building strong relationships with our clients worldwide. As we continue to expand our global presence, our commitment remains unchanged to provide dependable solutions backed by technical expertise and professional service.

I would like to take this opportunity to thank our clients, partners, and team members for their continued trust and support.

We look forward to building stronger partnerships and contributing to sustainable and resilient infrastructure across the globe.

T. C. Vitharana
Managing Director
Skytech Engineering

About Us

Skytech Engineering is a globally oriented engineering solutions provider specializing in environmental protection, marine infrastructure, and sustainable development systems. With a strong focus on quality, innovation, and performance, we deliver products designed to meet the demands of modern civil and marine engineering projects.

Operating through our two specialized brands, WavePlus and SkyGrow, we offer a comprehensive range of solutions across coastal protection, water management, urban landscaping, and agricultural applications. WavePlus focuses on high-performance marine and environmental products, while SkyGrow is dedicated to green and sustainable solutions for urban and agricultural development.

Our products are manufactured using premium-grade materials sourced from internationally recognized suppliers, ensuring durability, reliability, and long-term performance even in the most challenging environments. We work closely with contractors, consultants, and project stakeholders to provide tailored solutions that align with specific project requirements.

With an expanding global presence and operational offices in the UAE, Sri Lanka, and the United States, Skytech Engineering serves clients across multiple international markets, delivering efficient logistics, technical expertise, and reliable supply capabilities.

At Skytech Engineering, we don't just supply products, we deliver engineered solutions that support resilient infrastructure and a more sustainable future.

Company Milestones

- **2010 – Skytech Engineering (Pvt) Ltd** was established in Sri Lanka, marking the beginning of our journey in engineering and environmental solutions.
- **2022 – Skytech Engineering L.L.C-FZ** was founded in the UAE, expanding our operations to the Middle East and strengthening our international presence.
- **2025 – USA Office** launched, extending our footprint to North America and enabling global supply and technical support for international clients.

Vision

To become the most preferred and inspired solution provider to protect the environment for the present and future generations by supporting innovative environmental protective products and services.

Mision

To continuously develop and supply innovative environmental protective products and services at the highest quality standards and at competitive prices to conserve and restore the natural ecosystem.

Our Suppliers & Strategic Partnerships

At Skytech Engineering, we collaborate with internationally recognized manufacturers to ensure the highest standards of quality, reliability, and performance across our product range.

We are proud to act as the exclusive (sole) agent in Sri Lanka for selected global brands, while sourcing premium materials from trusted partners worldwide.

TESSILBRENTA SRL – ITALY

Exclusive agents for non-woven geotextiles under the brand name GEOTESS. These materials are widely used in marine and environmental engineering applications and play a key role in the manufacturing of high-quality geo bags.

DAEYOUN GEOTECH CO. LTD – SOUTH KOREA

Exclusive agents for woven PET geotextiles under the brand name GEONIA. These geotextiles are specifically designed for high-strength reinforcement and construction applications and are extensively used in the production of geo tubes and geo bags.

HOCK GEOSYNTHETICS – CHINA

Exclusive agents for woven PP geotextiles designed for high-strength reinforcement and construction applications. These materials are primarily used in the manufacturing of silt curtains and PP geo tubes.

GEONAT PET – SAUDI ARABIA

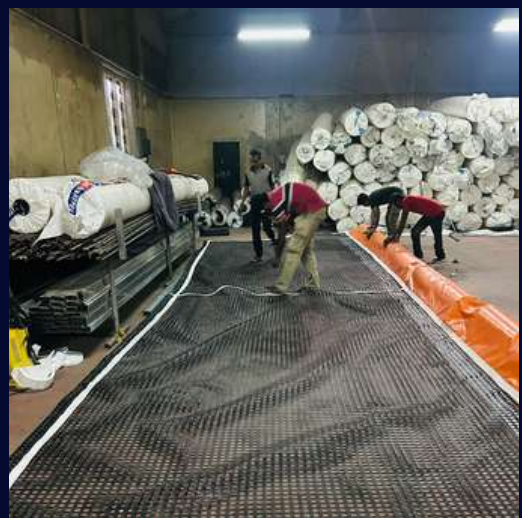

Exclusive agents for non-woven geotextiles widely used in marine, civil, and environmental engineering applications, and commonly utilized in the production of geo bags.

Our Manufacturing Excellence

At Skytech Engineering, we utilize the latest technology and advanced machinery to ensure a smooth and efficient production process. Our manufacturing facility is equipped to handle precision cutting, stitching, and high-performance fabrication, delivering products of superior quality and consistency.

Our team of skilled and experienced professionals plays a vital role in maintaining high production standards, ensuring every product is manufactured with accuracy and care.

We operate under an ISO 9001:2015 certified Quality Management System, reflecting our commitment to quality, reliability, and continuous improvement.

Product Range

WavePlus

Focused on marine, coastal, and environmental engineering solutions, including geo bags, geo tubes, silt curtains, oil booms, and flood control systems.

SkyGrow

Dedicated to green and sustainable solutions, including vertical garden systems, fabric grow bags, and horticulture products for urban landscaping and agriculture.

WavePlus Range

Geo Bags

WavePlus Geo Bags are high-performance geotextile containers designed for a wide range of hydraulic and environmental applications from coastal erosion control and shoreline protection to flood defense and embankment reinforcement.

Jumbo Bags

WavePlus Jumbo Bags are engineered geosynthetic solutions designed for coastal, marine, and environmental protection projects. Built for high-capacity containment and durability, they are ideal for shoreline protection, erosion control, dredging support, and emergency works.

Geo Tubes

WavePlus Geo Tubes are manufactured with high-performance PP geotextile material for a wide range of hydraulic and environmental applications. Designed to control erosion, reclaim land and sediment control.

Silt Curtains

WavePlus Silt Curtains are engineered turbidity barriers designed to contain and control the dispersion of suspended sediments in aquatic environments during dredging, reclamation, marine construction, and shoreline protection activities.

WavePlus Range

Oil Booms

WavePlus Oil Booms are specially engineered for effective and reliable containment of oil spills, fuel leaks, and other hazardous liquid discharges in marine and industrial environments. Crafted from high-strength, UV-resistant materials, these oil spill booms ensure superior performance and long-lasting durability, even in harsh weather conditions.

Beach Safety Booms

WavePlus Beach Safety Booms are expertly engineered to establish safe swimming zones, restrict boat access, and guide beachgoers within clearly designated areas. These beach safety booms provide reliable performance and long-term durability in coastal and marine environments.

Trash Booms

WavePlus Trash Booms are designed to contain and control floating debris, plastics, vegetation, and solid waste in water bodies.

SkyGrow Range

FREE STANDING TYPE GREEN WALL STRUCTURES

Our self-standing live green wall is a perfect option for indoor spaces that require integrating nature and building a sustainable, aesthetically appealing environment. With a self-contained water tank, the need for a drainage point or water connection is completely eliminated. Thanks to the integrated full-spectrum LED grow lamp, the natural photosynthesis activity of plants is perfectly facilitated even without natural sunlight.

WALL MOUNTED GREEN WALL STRUCTURES

Our prefabricated, wall-mounted live green wall structures are easy to install, perfect for both indoor and outdoor environments where a water connection and drainage point are available. The product comes in four standard sizes, and customization is possible.

FABRIC AND BRACKET TYPE GREEN WALL PANELS

Enhance your vertical gardening experience with our cost-effective fabric pocket wall mounting system. This system features a fabric pocket panel, designed without a steel framework, making it lightweight and easy to install using two steel brackets. This system offers a practical solution for creating a lush, green wall at an affordable price.

MINIATURE COUNTER TOP TYPE GREEN WALL PANELS

Equipped with integrated lighting and a self-watering system, it ensures your plants thrive with minimal maintenance. Perfect for adding a touch of greenery to your kitchen, office, or living space, this stylish and functional unit brings nature indoors, enhancing both your environment and well-being.

SkyGrow Range

ALL IN ONE AQUAPONIC STRUCTURES

All-in-one Aquaponic solution can grow 240 plants with around 2 dozens of fish with the use of just 2 sqm indoor floor space. This system is easy to manage and allows you to cultivate chemical-free, organic greens for your daily meals.

FABRIC GROW BAGS

Introducing Fabric Grow Bags, crafted to optimize plant growth through improved aeration, efficient water drainage, and protection of roots from external heat. These bags provide ideal conditions for plant development, fostering healthier and more robust growth compared to traditional containers.

FABRIC RAISED BEDS

Designed with these features in mind, this product offers an ideal environment for cultivating tomatoes or any other vegetable. Whether you're a seasoned gardener or just starting out, Fabric Raised Beds provide the perfect solution for healthy and thriving plants. These Fabric Raised Beds are available in two sizes to match your unique growing needs.

COCO PEAT

Coco peat has become the best soil conditioner due to its amazing capacity to hold both liquids and air. Additionally, coco peat is the perfect product to use in greenhouse cultivation as a soil-free growing media. Also, identified as one of the best natural materials for animal bedding.
